### Extended Concentric Vent Termination Kits

Concentric vents make it easier to have a two-pipe installation for high efficiency furnaces. These vents simplify installation and only require one hole through the wall or roof where the pipes terminate. Without using these vents, the installation would require cutting two holes through the home, one for each pipe. These vents save time and money by reducing the amount of work required. The extended length of these vents help to maintain clearance above the anticipated snow level to meet local code requirement.
