

SUPER CHANGE™ SOLUTIONS

FAST & EASY R22 RETROFIT IN CANS OR FLEXIBLE INSTALLATION HOSES

Super Change™ in a can and Super Change™ Inject allows professional HVAC/R contractors a fast and easy way to convert a system from non-POE based oils and refrigerants such as R22 to newer HFC refrigerants including POE-based R407C and R410A without the need to flush the system (excluding compressor burnouts). By adding Super Change with the new refrigerant and oil, a chemical link is created between the old and new oil, thus avoiding a full flush and saving contractors significant time on a system changeout.

Part# 991
Super Change™ Inject

Super Change™ benefits include:

- No changeout of the oil, O-rings or gaskets required
- Replaces lineset flushes
- Boosts oil return efficiency and extends compressor life
- Reduces oil logging which is critical in systems with long lineset runs and rises
- No tools or manifold gauges required
- Compatible with all oils and refrigerants
- Available in two injection methods
