

Frequently Asked Questions

Quick-Swivel

What is the “H” bracket used for?

The “H” bracket (QSWI1000 & QSWI3000) swivels are used when 4 points of attachment are necessary for your unit.

What is the the “I” bracket used for?

The “I” bracket (QSWI2000 & QSWI4000) swivels are used when 2 points of attachment are necessary for your unit.

What is the “U” mount?

The “U” mount is used for mounting to rafters, when there is not a flush surface to attach to. The “U” mount is available in both “H”(QSWI1000) and “I”(QSWI2000) bracket models.

What is the flush mount?

The flush mount is used for mounting to a flat ceiling. The flush mount is available in both “H”(QSWI3000) and “I”(QSWI4000) bracket models.

Is there a heavy duty Swivel?

Yes, the QSWI5000. It holds up to 400lbs and has six bolts of attachment. The QSWI5000 is available in the flush mount model.
