

**Specifications**

- Product** Refractometer
- Application** Freezing points of Ethylene & Propylene Glycol coolants and battery acid level
- Purpose** Measures the concentration of an aqueous solution by measuring its refractive index.
- Composition** Metal body with heat-blocking rubber hand grip, cushioned eye-piece and non-roll stand.
- Advantages** This precise instrument is small, light, and only needs a few drops of a solution to take a measurement. The user friendly interface is convenient and the sensitive prism inside the refractometer is housed in a high impact plastic enclosure for years of reliable use.
- Range** -60 to 32°F, 1.15 to 1.3 S/G
- Resolution** 10°F, 0.01 S/G

**Package Metrics**

- Producer of Goods** DiversiTech
- Domestic/Foreign Commodity** Foreign
